"Most people have no control over their emotional well-being. They feel ecstatic when good stuff happens and depressed when things go wrong. Their lives are roller coaster rides: sometimes up, sometimes way down.

But what if you could be happy no matter what happens.

True happiness is to enjoy the present, without anxious dependence upon the future, not to amuse ourselves with either hopes or fears but to get satisfied with what we have, which is sufficient, for he that is so wants nothing. The greatest blessings of mankind are within us and within our reach. A wise man is content with his lot, whatever it may be, without wishing for what he has not. "

Instead of thinking about what you're missing, try thinking about what you have that everyone else is missing.

Believe in Yourself and People Will Be Forced to Believe in You

Billions of people fail to live the life they have always wished to live. They fail to realize their ambitions and give up on their big dreams as soon as they encounter the first obstacle. One of the strongest causes for this attitude is that they do not believe in themselves.

Believing in yourself is all about being sure that you are going to do whatever you want even if others were against you. Usually, when you decide to take a big challenge or to do something that people failed to do you will find that everyone is putting you down.

Under the pressure of criticism some people start to doubt their own abilities and eventually give up. Few people who manage to believe in themselves and who continue moving along the path they've chosen are the ones who succeed.
